8-koi Acquires Cape Design Engineering as Wholly-Owned Subsidiary

The acquisition will allow 8-koi to pursue more competitive opportunities for specialized mil-spec construction work to include healthcare and training facilities as a complement to existing capabilities.

Melbourne, FL, March 25, 2019 — 8-koi President Inga Young negotiates acquisition of Merritt Island design-build firm Cape Design Engineering Co. (CDE) as a wholly-owned subsidiary to expand WOSB mil-spec construction capabilities. CDE was founded in 1997 and has completed an extensive portfolio of high-profile specialty work for government and commercial customers. 8-koi is a woman-owned government contractor headquartered in Melbourne, FL specializing in training/technical and administrative support, healthcare, and construction, and currently employs 25 people across the US.

In the sales agreement closed on March 25 with CDE Owners Kannan Rengarajan & Rama Kannan, and Lutfi and Peggy Mized, 8-koi will acquire all construction equipment and staff to include engineering staff, project managers, on-site foreman and crew, in addition to the full portfolio of work being performed under federal contract. Current projects include HVAC upgrades at SWFLNT Kings Bay MIB and RIB, HVAC upgrades at NASA KSC VAB, and NOTU Trident Basin upgrades.

“8-koi acquired CDE because of the similar and familiar culture. We’ve been doing business together for years and have found compatibility that will help to ensure a smooth transition with little to no effect on day-to-day operations. Our focus will remain on supporting our customers with our core values,” says 8-koi President Inga Young.

Over the past three years, 8-koi and CDE have successfully completed projects at Naval Hospital Jacksonville (Exam Room Modernization and Communications), and at Kings Bay Marine Administrative Building (HVAC upgrades). 8-koi will continue to operate under 8-koi’s Florida Certified General Contractor License #CGCo28685.

The acquisition will allow 8-koi to pursue more competitive opportunities for specialized mil-spec construction work to include healthcare and training facilities as a complement to the company’s existing capabilities. The company anticipates expanding headquarters in Melbourne, FL later this year.

About 8-koi
