

Social and Behavioral Sciences Core Presents HIV at 40: Looking Back and Moving Forward

Please Join us via Zoom

Wednesday, September 22nd from 1 pm to 2 pm EST
for a panel discussion on HIV at 40: Looking Back and Moving Forward.

Our distinguished panelists will be discussing HIV in the context of how far we have come, how COVID is impacting our present, and the future of research and care in the field.

The panel will be moderated by Nina Yamanis, PhD, CFAR Social and Behavioral Sciences Associate Core Director.

To receive the Zoom log in information, please RSVP [here](#).

Rupali Doshi, MD, MS (GW and DC Health)

Dr. Doshi is the Chief of the Strategic Information Division at the DC Department of Health as well as serving as an epidemiologist at GWU. Her current HIV research work centers around improving HIV care through rapid ART initiation.

Marcia Ellis, MA (DC CFAR)

Ms. Ellis has been involved in HIV and AIDS and health and wellness advocacy for over 20 years. She serves as the DC CFAR community coordinator and Chair of the Community Partnership Counsel (CPC), facilitating and supporting meaningful community engagement and partnerships between CFAR investigators and the DC community. She recently published an article in AJPH on HIV at 40 titled, Forty years of Fighting for Equitable Partnering in HIV Research: We Are Not there Yet

Audrey Pettifor, PhD (University of North Carolina)

Dr. Pettifor is an epidemiologist whose research focuses on sexual behavior and determinants of HIV/STI infection in sub-Saharan Africa. Her goal is to identify modifiable risk factors and develop novel interventions to prevent new HIV infections—particularly among adolescents and young women. Recently, Dr. Pettifor has taken her expertise in HIV prevention and applied it to understanding COVID.
