**Activating the Divine  
Octave of Your Soul to  
Illuminate the Living  
Blueprint of Your Divine  
Soul Plan**

**We will awaken the divine octave through toning and breathe work. Judith will guide you through the mirror of the soul, the Mirror of Mary Magdalene to illuminate the living blueprint of your soul to mirror into your physical reality with the Divine Octave of your soul at the Source of Creation. Judith will open the Womb of Creation with the Formulas of Illumination for the Manna from source to flow through the consciousness of each individual's soul and into the hologram of reality. You will experience vibrations from source that activate the light codes in your DNA awakening your divine hologram.**

**The blueprint of your soul in the Records of Creation and the and the physical reality are geometric holograms of the Flower of Life. It is the pure pattern of the interwoven geometric principles for the manifestation of your soul's design. We open to the holographic universe and the hologram of creation opening the two flower of life holograms of the blueprint of your soul. One hologram is the soul's blueprint in creation. The second hologram is the blueprint of manifestation of the physical reality.**

**All of reality is a holographic mirror, a reflection of the divine hologram infuses the physical reality of the living hologram of physical reality with the patterns that manifest as Divine guidance for your life plan. The direction you take in your life is either in balance and harmony with the living blueprint, or the result of distortions in the hologram of your reality. The energy distortions come in the form of doubt, shame, and fear, clouding your reality, by distorting the mirror of the living hologram in the material existence. The distortions make it difficult for you to see and know your way and your Soul purpose. As you raise your energy vibration you activate the codes of light in your DNA to illuminate the blueprint of your Soul in the Divine hologram of creation.**

**Each person has a Divine octave that resonates with the Blueprint of the Soul.**
