

## **GARDEN TIPS FOR JANUARY**

- ❖ If precipitation has been deficient (1" of snow = ~ 1/10" of water), water lawns, trees, and shrubs, especially broadleaf and narrow leaf evergreens. Double check moisture in protected or raised planters.
- ❖ Check on supplies of pesticides. Secure a copy of current recommendations and post them in a convenient place. Dilution and quantity tables are also useful.
- ❖ If you did not treat young pines for tip borers in November, do so before March.
- ❖ Check that gardening tools and equipment are in good repair—sharpen, paint, and repair mowers, edgers, sprayers, and dusters.
- ❖ Inspect your irrigation system and replace worn or broken parts.
- ❖ Control overwintering insects on deciduous trees or shrubs with dormant oil sprays applied when the temperature is above 40°F in late fall and winter. Do not use "dormant" oils on evergreens. ([EPP-7306](#)).
- ❖ A product containing glyphosate plus a post-emergent broadleaf herbicide can be used on dormant bermudagrass in January or February when temperatures are above 50°F for winter weed control.
