Customer Guidance: Windows Settings to Maximize Communication Efficiency with SEAL Instrumentation

---

Instructions:

- Open the Control Panel

- Click on Power Options. If Power Options isn't an immediately available option, navigate to System and Security, then Power Options.

- Perform the following steps for both Balanced and Power Saver

    o Click Change plan settings

    o Click Change advanced power settings

    o Expand the Hard disk option

        ▪ Expand the Turn off hard disk after and set to Never (0 minutes)

    o Expand the Sleep option

    o Set Sleep after and Hibernate after to Never (0 minutes)

    o Expand the USB Settings

        ▪ Set USB selective suspend setting to Disabled

    o Click OK in the Advanced Power Settings window

    o Click Save changes in the Edit Plan Settings window

    o (Perform these steps for both Balanced and Power Saver)

- Navigate back to the Control Panel menu

- Click on Folder Options. If Folder Options isn't an immediately available option, navigate to Appearance and Personalization, then Folder Options

- Select the View tab

- Deselect the Use Sharing Wizard (Recommended) option

- Click OK
