

Mobility Solutions

Move beyond your expectations.

MetTel's mobile expertise provides forward-thinking control over all of your company's devices. We provide all staging, kitting and procurement plus total mobile device management and better, wider coverage—all at a lower cost. Plus, with MetTel's communication management platform, you get real-time reporting with variance forecasts and alerts, controlling costs before overages are incurred. MetTel provides centralized billing and invoicing for all your devices across locations and carrier networks.

Key Benefits

One Invoice regardless of number of carriers or contracts.

One Pool Yes, all your data can be pooled and shared regardless of the network.

One Dedicated Account Management Team who knows your account and knows your name.

One Platform with instantly actionable tools, so you get results in seconds, not days.

One IoT SIM that searches and connects to the best network, worldwide: a MetTel exclusive.

One Universal DEP Environment applies your business rules and policies to all of your mobile devices.

Top Three Networks for 99.5% nationwide coverage.

One of Only Three mobile carriers that was awarded GSA EIS \$50 billion contract.

Forward-Thinking Mobility Management

UNSURPASSED MOBILITY EXPERTISE

Whether MDM, IoT, Fleet, Telehealth, or mobile app development—MetTel's team of specialists guide you to the best solutions for your needs.

U.S.-BASED HELP DESK

Your employees get a dedicated toll-free number for support. We establish a play book for our agents to take care of your calls based on your needs. Together, we solve little issues before they become major problems.

CENTRALIZED KITTING & DEPLOYMENT

From device deployment, approved accessories, custom collateral, and pre-loading approved apps—we'll make sure your devices arrive the way you need them, ready to use, right out of the box.

PROACTIVE ANALYTICS & REPORTING

Our team builds and hosts custom reports based on how and when you need them. Gain insight into spending patterns, variances and forecasts by your location, region, state or system-wide. Any configuration can be accommodated, parsed and understood.

STAY IN THE KNOW

Whether it's placing an order or submitting a trouble ticket, you'll be notified via email every step of the way. Need to know now? Log in to Bruin, our management platform, to see live notes. You can even add urgent notes to escalate your issues when necessary.

Auto-Intelligent Actions

SIMPLICITY IN ACTION

Our asset management platform, Bruin, provides visibility, optimization, and transformation control. With finance and operational modules, you'll get automated inventory management, budgets and inventory controls, complete vendor visibility, and real-time control over all your assets.

OVERAGE PROTECTION

Bruin will make plan changes based on usage patterns to give you the right amount of data each month, eliminating costly overage penalties. Our platform follows your predefined rules to suspend or disconnect lines that have no usage or excessive, out-of-pattern usage before those extras add up.

ELIMINATE INTERNATIONAL BILL SHOCK

No more worrying about international overages. Bruin automatically assigns international plans based on live usage to reduce long distance calling charges.

INTEGRATE YOUR HR FILE

Automatically create orders for new hires. Routinely suspends or disconnects devices for terminated employees.
