

To be a leader in the Materials Testing Industry, we strive to have a team of bright and hard-working individuals in order to truly succeed. At PES, we carefully search for the top talent - people who bring a fire and passion to be challenged and create solutions in their day-to-day tasks. We spoke with Chad H. today - one of our new hires in the Mechanical Lab - about what makes him special, his background, and why he was so excited to join PES.

“Chad, tell us a little bit about your background and experiences prior to joining PES.”

Chad: Prior to working at PES, I graduated from IUP with a BS in Biology and a minor in Chemistry. After that, I went into retail management for a number of years. Due to being drained and company cutbacks occurring, I started working as a Chemical Lab Technician at a local laboratory. And now, thankfully, I am at PES.

“What made you choose PES?”

Chad: A previous employee just raved about PES to my wife and myself about the work, the family atmosphere, and the potential for being part of a strong, dedicated team. After some coaxing, (a while 2 discussions,) I applied. I was treated with the utmost respect throughout the interview process and was given an offer which I gladly accepted.

“Tell us what you like to do outside of work?”

Chad: Outside of work, I love to spend time with my family and friends. When my wife and I aren't on some adventure with our son, I enjoy renovating our craftsmen house. Beyond that, I enjoy rehearsing music with my old bandmates and teaching my son music theory and instrumentation.

“What would you tell your younger self?”

Chad: “Follow your dreams!!”
