Inspiring Girls to Code

All-Girls Code/Art Competitions 2026

Annual Coding Competitions for Girls in Grades 3-12

CodeYourSelf™:

Bring your story to life by coding your own self-portrait. This is your chance to combine art and technology to express who you are in a unique, digital way. No matter your skill level, your imagination is all you need to get started!

Individual Entry, Grades 3-12

Game Design:

Calling all gamers! For this competition, students must design and develop their own original game. Whether it's a puzzle game that requires logical thinking or an interactive storytelling experience with branching narratives, the choice is yours.

Individual Entry, Grades 3-12

Coded Animated Art:

Get your artwork in motion! Your coded animation can feature patterns, shapes, characters, or landscapes and should have movement that starts automatically or when the program is run. The opportunities are endless!

Individual Entry, Grades 3-12

Changemaker Challenge:

Be a changemaker with tech! In this Future Tech LeadHER Challenge, teams of 1-5 students will identify an issue in their community and create a solution through a website or app. Finalists will pitch their ideas to industry professionals during a live round.

Team Challenge, Grades 9-12

Deadline: Feb. 10, 2026
