

HOLT'S HOUSE OF HOPE

CLEAN WATER for Boca Chica

Through some local partnerships and connections, we have been presented with the opportunity to build a water treatment facility on our land in Boca Chica, where we can sell clean water to the local community at a discounted price. Currently, the only access to clean water for the local community is through purchasing 5 gallon jugs at local colmados for between \$1.25 and \$1.50 normally, but we can provide as good or better quality water for about 1/3 of the price. This opportunity will be a game changer for our ministry and for engaging with the local community with the opportunity to share the gospel. We have seen similar facilities prove to be transformational among local churches and communities. To make this a reality, we need your help!
