People with disabilities, their families and communities are central to building a good life. For many, however, services are part of their support story. Whether you're receiving DD (Developmental Disabilities) services or interested in hearing more about them, join us! Learn how families are engaged and empowered to shape outcomes in their lives and the service system through family outreach and education. Get updates about waiver funding, and hear outcomes of the nearly 2 year effort to unify, simplify and strengthen the Individual Service Plan (ISP) across Ohio.
