Dear Valued Provider:

ODM allows agency providers to choose and certify an alternate (alt.) EVV system to use for the Ohio EVV Program. An alt. EVV system is an EVV system that is not the EVV system ODM provides through Sandata Technologies. If an agency chooses to use an alt. EVV system, all visit creation and editing must be done within the alt. EVV system implemented by the provider. Visits must be sent from the alt. EVV system to the Sandata Aggregator within 24 hours of entry and/or edits. Agencies using an alt. EVV system will only be able to view visit data in the Sandata Aggregator.

Phase 2 Alt. EVV Certification and Recertification processes will officially open on **January 7, 2019**.
