Edmonton, AB T5K 2N2

To: Kinship and Foster Caregivers

Date: June 12, 2020

Subject: **Family Visits and the Use of Personal Protective Equipment**

Dear caregiver,

On June 8, 2020, we sent a letter to you outlining our plan for staff to begin in-person visits with children, youth, families and caregivers, and for visits between children and their families to start to occur in-person. In the letter, we mentioned the attached two documents as important for you to review:

- *CI Infographic Kinship and Foster Caregivers: Do I need Personal Protective Equipment?*
- *Caregiver Guidance for Family Visits and the Use of Personal Protective Equipment*

We are pleased to share these documents with you today. These documents provide guidance developed to help caregivers and those supporting caregivers with deciding which PPE is best and information about family visits including, screening questions and preventing the spread of COVID-19.

Thank you for your dedication to the children in your care and we apologize for any confusion this may have caused.
