[Safety Assessment Program] SAP Training

Post-disaster building Safety-Assessment Program (SAP) training provides architects, engineers, and building inspectors with the knowledge to provide evaluations of facilities and buildings in the aftermath of a disaster.

ELIGIBLE PARTICIPANTS:

All building industry professionals are welcome and will receive a class attendance certificate. Unlicensed professionals are welcome to attend the training and will receive an attendance certificate, but will not be "SAP Certified". After successfully completing SAP Training, eligible participants may elect to join AIA Louisiana's Disaster Assistance Program and volunteer to perform post-disaster assessments when needed.

ELIGIBLE PRACTICIONERS INCLUDE:

- Licensed architects
- Registered civil, structural, or geotechnical engineers
- Certified building officials and inspectors

CERTIFICATION PROCESS:

The AIA Disaster Assistance Program is based upon California's Office of Emergency Services (OES) Safety Assessment Program (SAP). After successfully completing AIA's SAP training, eligible practitioners (see info above) will earn a California-issued OES certificate and SAP ID Card.

PROGRAM DETAILS:

This full day, in-person all-hazards training course will refer to the SAP Evaluator Handbook as well as Applied Technology Council (ATC) Manual 20-1 and 45. Trainers will share experience from the field and will walk attendees through interactive case studies; demonstrating common damage and safety precautions. 6 AIA HSW CEUs will be earned. Lunch and training materials will be provided; all attendees should plan to bring laptop or iPad with them as the handbook is digital (two manuals are hardcopy and will be provided).

WHEN:
Friday, November 10, 2017
9:30 AM – 4:30 PM (Central Time Zone)
Lunch and course materials provided.

WHERE:
Goodwood Main Library
Large Conference Room; # 102
7711 Goodwood Blvd.
Baton Rouge, LA 70806
