WEEK SIX: Let's Dream!

Let's dream of what our life will be like without debt, let's look ahead to retirement. Are we living our best life in retirement or are we banking on social security?

Fifty two percent of American workers have less than \$10000.00 saved for retirement. The average social security received yearly is \$17,000.00. Every step you take, eliminating debt, saving and investing gets you closer to your dream.

One of the easiest ways to save for the future is to save regularly through automatic deductions into an investment account such as a 401k. Investing is a tool for building wealth, it's all about working smarter and not harder. Warren Buffet defines investing as laying out money now to receive more money in the future. I challenge you this week to research the different investment opportunities available to you.

The bible says in Jeremiah 29:11 "For I know the plans I have for you" declares the Lord, "plans to prosper you and not to harm you, plans to give you hope and a future." God wants the best for our future but He can't want it more for us than we want it for ourselves. It's never too late to start, flowers start as seeds! Plant your seeds now, water them and watch them grow.

Remember you don't get to live out your dreams without a plan and dreams without plans are called wishes. Are you planning or are you wishing?
