<b>Total Damaged:</b> 72			

## CURRENT SITUATION

### Current Situation

**Dixie Fire West Zone** – Overnight temperatures remained warm with low relative humidity recovery. An inversion kept smoke over the fire with pockets of clear sky. Windy conditions will remain in the area with high pressure building today and predicted thunderstorms. Crews will continue to reinforce control lines, aggressively mop up hotspots, and provide structure protection in the fire perimeter. Damage inspection teams continue to make progress surveying areas where fire activity has diminished. The number of damaged and destroyed structures reflected may change as teams continue to make progress. Evacuation Warnings and Evacuation Orders are changing every day, please see below for information affecting your area.

**Dixie Fire East Zone** – Dozers were utilized to expand containment lines as the fire continues to back down at Keddie Ridge. Tactical firing operations

	<p>were also conducted to reduce the threat to structures along Keddie Ridge and in Indian Valley. The afternoon peak in fire activity led to additional resources being assigned in and around Wilcox Valley. Due to the fire intensity there, firefighters were forced to pull out from direct attack but continued to construct indirect lines. The fire continues to slow down in the limited available fuels of the Sheep fire scar. Control lines are being constructed across the fire scar, connecting from Hamilton Mountain to near Lone Rock. Hoses are being added to the lines around Dyer Mountain as an additional tool in securing containment.</p>
