RE: Compact Training Resources – Education and Awareness

“The mission of the MIC3 Training Committee is to respond to the needs of the various audiences to provide accurate, current, and customized content about the Compact for use by Commissioners, schools, families, and military-connected stakeholders.”

Under the Compact statute and by-laws, member states are directed to coordinate education, training, and public awareness regarding the Compact's implementation and operation. For this reason, the training program is continually evolving to meet the needs of member states. The constant turnover in education and military personnel has underscored the need to continue educating local education authorities and military families on the available tools and resources that promote awareness and understanding of the Compact.

The Training Committee is committed to equipping Commissioners, designees, and Ex-officio members with the tools and resources necessary to educate our school districts and military families on the Compact.

Awareness and Promotion

- To raise awareness of the Compact, disseminate the online ["What is MIC3" One-Pager](#) to districts/schools at the beginning and end of the school year.
- Raise awareness and promote the Compact using practices outlined in the [Good, Better, Best: State Best Practices on Implementing the Compact](#) document with the aid of Commission tools and resources.
