About the MINI EXPO

In collaboration with the Ontario Community Paramedicine Knowledge Exchange Committee and the Ontario Association of Paramedic Chiefs, the Western community paramedicine providers are pleased to host this virtual educational event. The primary goal is to increase awareness and collaboration amongst health service providers, with a spotlight on community paramedicine as an integral partner in the health care system. This event will provide an opportunity for CP providers to highlight success stories and open channels for increased knowledge exchange opportunities, share best practices and improved future application.
