בני האלוהים

### Beni HaElohim 153

$$1 + 2 + 3 + 4 + 5 + 6 + 7 + 8 + 9 + 10 + 11 + 12 + 13 + 14 + 15 + 16 + 17 = 153$$

**Gen 6:2** that the **sons of God** saw the daughters **of** men, that they *were* beautiful; and they took wives for themselves **of** all whom they chose.

**Luke 20:36** “nor can they die anymore, for they are equal to the angels and are **sons of God**, being **sons of the resurrection**.

**Romans 8:14** For as many as are led by the Spirit **of God**, these are **sons of God**.

**Galatians 3:26** For you are all **sons of God** through faith in Christ Jesus.

**John 21: 11** Simon Peter went up and dragged the net to land, full of large fish, **one hundred and fifty-three**; and although there were so many, the net was not broken. (**153 Fish**)

- On adding the number 153 to its reverse, 504 is obtained, whose square is the smallest square which can be expressed as the product of two different non-square numbers which are reverse of one another:

$$(17) 153 + 351 = 504$$

*Ekklesia* Ἐκκλησία church = 504

There is a deep link between the symbol of Christ as the *Fish/Fisherman*, the *Sacrifice*, the *Passover* (153), the *Covenant* (612 = 4 x 153), and the *Net* (1224 = 2 x 612) in John 21:11 that caught the 153 fish. The Number 153 is the seventeenth triangular number, hence also is the sum of the integers from 1 to 17:

### EZEKIEL 47:10

And it shall come to pass, that the **fishers** shall stand upon it from **En Gedi** even unto **En Eglaim**; they shall be a place to spread forth **nets**; their **fish** shall be according to their kinds, as the **fish** of the great sea, exceeding many.

The word **fishers** is the plural form based on the root **dayag**. The name of the first spring, **spring (en)**, root of the name of (the 16th letter **Ayin**) is **Gedi**, and anagram of **dayag** and so of the same numerical value, 17. It means a "young goat" or "kid." Note the phonetic similarity between "kid" and "gedi." Now the verse says that the "fishers" (**dayag**) shall stand upon the river **from the spring of Gedi to the spring of Eglaim**. We have the identity:

$$\text{Eglaim} = \text{Ayin (70)} + \text{Gimel (3)} + \text{Lamed (30)} + \text{Yod (10)} + \text{Mem (40)} = \underline{153}$$

From **Gedi = 17** to **Eglaim = 153**! Now this seems like quite a little more than a "mere coincidence."
