Elections Office Suite

The Elections Road-map to Success using VistaSG's *dms3* or DigiDrawer

OCR
Easily search & find documents regardless of indexing when your scans or imports come into dms3 or DigiDrawer.

Import
Bring all your digitized documents with indexes into one stored location for convenience.

Auto TEAMSync
Guarantee exact matches with TEAM using VUID #'s to automatically reference individual voter information.

Sweep
Automate the converting, routing, indexing of Voter Registration Applications by simply downloading them from DPS Portal.

ABBM
Simply scan an application allowing you to review signatures, create mailing labels, & communicate data to TEAM.

Audit Management
Meet State Election Audit requirements with ease by simply sorting, viewing, packaging, and exporting requests digitally saving immense amount of time and stress otherwise done manually.

IDentiHIDE/Ai
Automatically redact sensitive information based on your rules using this go beyond keywords & zones search tool; it seeks manual print, handwriting, & regular expressions to automatically redact sensitive information and learns to be even more accurate with each training.

Premium Services
Peace of mind to give you service beyond just making sure your software works with features such as free server moves, training, and project modifications, as well as discounts helping you maximize your technology investments.

Retention
Enables you to be in control of cleaning documents based on your rules or retention policies with a few clicks eliminating time doing this manually.
