NETWORK NOISE

A TABLETOP INCIDENT RESPONSE TRAINING FOR LOCAL GOVERNMENT

Join Cyber Florida Senior Fellow Stacy Arruda, Founder and CEO of the Arruda Group and former FBI Supervisory Special Agent, for an eye-opening experience that will help you better understand how to prevent and recover from cyberattacks. The event starts with Network Noise, a three-hour tabletop exercise where real-world cyberattack scenarios illustrate the far-reaching effects a cyberattack can inflict on your organization. Bring your leadership team to learn how cyberattacks impact not only IT but also legal, finance, operations, human resources, public relations, and other departments.

Once you understand the threat, move on to preparation with a session on creating a comprehensive cyber incident response plan specific to your organization. You'll leave equipped with a template and foundational plan you can take back to complete and test with your organization.
