

North American building envelopes require flexible products that can withstand extreme weather variations. Our hybrid and 100% silicone Adseal sealants are manufactured in Canada, certified Ecologo, ideal for doors, windows, and siding, and match all Canexel and James Hardie colors.

Adseal sealants will not crack or split during their life span, even throughout multiple heat and cold cycles, contrarily to thermoplastics. Thermoplastic sealants soften or even melt when heated and harden when exposed to freezing temperatures. Adseal sealants are tack free within 10 to 30 minutes, thereby reducing the risk of contamination by dust or other particles. Our hybrid sealants are ready to paint after 30 minutes and our 100% silicone sealants are offered in over 400 colors.

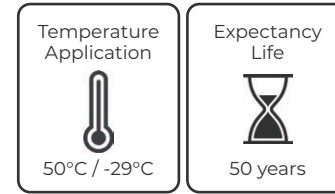

### 1940 SERIES HYBRID SEALANT | PAINTABLE
