

CHANGES COMING FOR SAM.GOV AND BETA.SAM.GOV SPRING 2021

Kim Garber, WPI

February 23, 2021

The General Services Administration launched [beta.SAM.gov](https://beta.sam.gov) in 2017 as the modernized environment where the 10 Integrated Award Environment (IAE) systems will become one. To date, three IAE systems have migrated into [beta.SAM.gov](https://beta.sam.gov) completely and some functionality from a fourth system has also merged into the new environment. Next up is SAM.gov, where users register to do business with the federal government, find exclusion records, and perform other tasks. After the merger, the system will be known only as SAM.gov (no more “beta”).

Phase one, scheduled for April 26, 2021, will change the **look and feel** of [beta.SAM.gov](https://beta.sam.gov) to prepare for the SAM.gov merge.

Phase two, scheduled for May 24, 2021, will migrate the **functionality** of SAM.gov into [beta.SAM.gov](https://beta.sam.gov) (keeping the new design). The term “beta” will be retired, and there will be only one SAM.gov. This change affects all SAM.gov users.

After May 24, SAM.gov users will see a home page that enables them to perform tasks currently found at [beta.SAM.gov](https://beta.sam.gov) such as searching for contract opportunities, finding wage determinations, and more, as well as the things they currently can do at SAM.gov today - all under a single login.

Questions or request for assistance in the transition - contact Kim Garber, 608-444-0047 or kimg@wispro.org
