

# LDS Laundry Duct System

The Laundry Duct System (LDS) is a simple, clamp together ducting system that incorporated a gasketed, over-center clamp to draw together and seal the rolled lip formed on the end of all components. The LDS offers galvanized steel pipe (18-24 gauge), fittings and components available in sizes 4" - 36" with a rolled lip formed directly onto the pipe. Using the LDS provides infinite adjustability in the field to provide more flexibility, less waste and less time. The clamp system also gives you easy access to EVERY joint and fitting to allow cleaning of any lint built up. The LDS system can be used as a stand alone system or to adapt to many of several other ducting options.

The Laundry Duct System (LDS) is available in 4" - 36" diameter, 18-24 gauge available, various lengths with fittings and adapters to match your system needs.
