

URGENT "VIRTUAL" BLOOD DRIVE FOR CHUCK DAVIS

Chuck has been hospitalized since April 14th with internal bleeding due to cancer, which has required about a blood transfusion per day. He'll remain hospitalized, also receiving chemotherapy weekly, until the bleeding stops.

We need your help! Chuck hopes to replace the units of blood he has already used and help the Blood Bank re-stock for the next people in need. Our goal is 50 units of blood!! Chuck would be so pleased if his illness could help make a difference for the hospital, the Blood Bank, and for others, through your generous donations!

All the pertinent information and answers to your questions on how and where to donate, and how to register, can be found at <http://www.bloodworksnw.org>. The drive will run for 6 weeks from today. When you donate, please use Chuck's unique code: CD15. Sign up, show up - it's LIFESAVING! 

Thank you for your consideration and action - your donation WILL make a difference!! Chuck, his family and friends, and his doctors and nurses, and the Blood Bank thank you!
