# NECA Manual of Labour Units 2021-22 Edition

An estimate is only as good as the information it is based on, and the NECA *Manual of Labor Units* (MLU) has been the estimating resource of choice for electrical contractors since 1923. The MLU provides an experience-based reference for estimating the electrical construction labor required to install typical electrical and communications systems.

**NEW IN 2021: This two-year subscription provides electronic access to the NECA Manual of Labor Units! With all of the features that were formerly featured on the CD, the online portal allows subscribers to access the labor units, the ability to export sections to excel, utilize calculators, customize column factoring and more.**

**Users who have TRA-SER accounts will still be able to use this subscription as an add-on, allowing the MLU information to be integrated with most major estimating software.**

**Available Formats: Book, PDF and Subscription**

Available online from the Canadian Electrical Contractors Association (CECA) website. If you do not have your ID and password, please call Gregg Whitty at 416-491-2414 or send an email to gxwhitty@ceca.org
