

# MATH IS FUN, FUN IS MATH!

WORKSHOP LED BY ALYSHIA DRAKE OF 'GROW FROM THE STEM' IN-HOME PRESCHOOL

**THURSDAY, JANUARY 30 ~ 6:00 – 8:00 PM**

**FIRST 5 AMADOR ~ 975 BROADWAY, JACKSON**

Did you know...

- Working at home with your child on math and numbers is more influential than preschool?
- Early math and numbers experience give children life-long confidence with math, making them better at it in school?
- Math isn't just about numbers?

Working with math and numbers can be intimidating, even for adults who were good at math in school. So many of us have negative associations with math, aren't confident in our math skills, or just might not know how or why we should work on math with our infants through early school-aged kids.

## THINGS WE 'LL LEARN WHILE HAVING FUN:

- Why parents reinforcing math skills is even more important than their child's school experience
- How to make math fun for you AND your infant through early school-aged child!
- When to introduce which math skills to support your child's development

**LIGHT DINNER AND FREE CHILD CARE PROVIDED!**

**PLEASE RSVP, AT 257-1092**
