Oklahoma Business Headlines for September 2026

- Nextnova Solar, a new brand under Thornova Solar, announced plans to build a 2-gigawatt n-type solar cell manufacturing facility outside Oklahoma City. The facility is expected to create about 300 jobs at launch, with construction set to begin in November. Mass production is slated to start in March 2027, and the company said the site is designed to scale up to 5 gigawatts of annual capacity as demand grows.

- Wall Colmonoy's Oklahoma City operation has secured a multiyear U.S. Air Force contract valued at about $4.75 million to remanufacture primary and secondary heat exchangers for the F-16 Fighting Falcon.

- Greenheck Group, a leading manufacturer of commercial air movement, control and conditioning equipment, has announced plans to acquire the former Macy's distribution facility in north Tulsa County. The 1.3 million-square-foot building represents nearly a $300 million investment that will result in more than 700 new jobs over the next five years.

- Construction is lining up for Miller Crossing, a 25-acre mixed-use development at 1900 S. Yukon Parkway, which marks the largest commercial venture in Yukon's history. Built on land annexed from Oklahoma City, the site will feature medical offices, retail shops, restaurants, a hotel space, a parking garage and an athletic complex. Construction on the athletic center and parking garage is expected to take about two years.

- Crusoe Energy Systems opened a second Tulsa plant to manufacture data center hardware that will be shipped to the largest data center in Texas. The 400,000-square-foot manufacturing plant in Tulsa builds

low-voltage switchboards. Many of those components will head straight to Abilene, Texas, where they will feed a 1,100-acre mega-campus used by OpenAI (ChatGPT) and Oracle (a variety of business AI platforms) to process prompts. This facility is known as Stargate.

- KIHOMAC plans to build a 130,000-square-foot facility to support its work with Tinker AFB, investing $25 million in the new space.

- V&S Schuler Tubular Products is investing $22 million in Muskogee. The company is expanding at the Port Muskogee John T. Griffin Industrial Park with a new facility—retaining more than 70 existing jobs and creating additional skilled positions.
