

From the Department of Homeland Security:

You're invited to join the U.S. Department of Homeland Security (DHS) Science and Technology Directorate (S&T) for the new LRBAA Today webinar series! S&T's Long Range Broad Agency Announcement (LRBAA) is a standing, open invitation to the scientific and technical communities to submit proposals for open topics that address priority homeland security needs. Small businesses are eligible to apply for the LRBAA program.

This is an excellent opportunity to learn more about the Department's research challenge areas, specific to S&T's LRBAA topics. During each webinar, viewers will hear about the work currently being pursued under the topic areas below and discussion on the context for the solutions sought. Join us for a live discussion and learn how to utilize the LRBAA program to work with S&T!

Register now for one (or all!) of the upcoming DHS LRBAA Today webinars:

Countering Unmanned Aircraft Systems August 20 1:00 - 1:30 pm ET

Bad actors are increasingly using Unmanned Aircraft Systems (UAS) for surveillance, reconnaissance, illicit conveyance, targeted attacks, disruption of operations, and other hostile actions. This LRBAA Today webinar will focus on the areas DHS S&T is pursuing against this threat by developing enhanced technologies and methods that allow for the detection, tracking, identification, and mitigation of UAS under varied terrains and environmental conditions.

Register today! <https://sri-csl.regfox.com/lrbaa-today-countering-unmanned-aircraft-systems>

Detection Canine Research and Development September 24 1:00 - 1:30 pm ET

Canines have been employed by law enforcement agencies for decades to detect threats from explosives to narcotics to invasive species in order to protect the Homeland. This LRBAA Today webinar will focus on DHS S&T's research and development efforts to provide the tools, techniques and knowledge to better understand, train and utilize detection canine teams.

Register today! <https://sri-csl.regfox.com/lrbaa-today-detection-canine-research-development>

The LRBAA Today webinar series is open to anyone interested in learning about solutions sought under the LRBAA Research Areas. These events are complimentary, but as space is limited, we strongly encourage you to register via the links in the webinar descriptions above.
