

National Aeronautics and Space Administration (NASA)

CCRPP solicitation (Phase II follow-on funding)

The Civilian Commercialization Readiness Pilot Program (CCRPP) is an additional funding opportunity available to small businesses, with a primary objective of accelerating the near-term transition of SBIR and STTR funded technologies to infusion and/or commercialization (not an incremental improvement in technology maturation alone). If you've recently won a Phase 2 award from our program, you are likely eligible.

The funding is a combination of additional SBIR/STTR program investment and NASA or non-NASA entity investment. The SBIR/STTR program will match between \$500,000 and \$2.5 million of the external investment.

FY23 CCRPP Application Period: **Opens December 13, 2022**
