

FY2022 - A Slurry Seal Project

Slurry Seal Construction Work

Slurry Seal Treatments on City Streets

Beginning August 15, 2022, American Asphalt South, Inc. will be implementing slurry seal treatments on various high priority streets throughout the City as part of the FY2022-A Pavement Maintenance (Slurry Seal) Project (see table below).

This preventative maintenance operation will extend the life of the roadways, while creating a smoother road surface. The slurry work and striping of the streets is scheduled to be completed end of Fall 2022.

Temporary disruptions should be anticipated, especially while paving is taking place. Detours and traffic control will be in effect. Parking restrictions and temporary delays should be expected in these areas.

“No Parking” signs will be posted at least 72 hours in advance of the work. The public is advised to respect and adhere to the “No Parking” notices in order to avoid vehicles being towed.

Slurry seal treatments can typically be completed within one working day. The public may use the street when the “No Parking” signs are removed from the area at the end of the day. Please refrain from driving on the surface until the contractor removes traffic control.

We greatly appreciate the public’s cooperation and apologize for any inconvenience.
