

100 SOLUTIONS TO REVERSE GLOBAL WARMING BY 2050

DANCED BY IMPACT
drawdown.org

DOWNWARD IS THAT POINT IN TIME WHEN THE CONCENTRATION OF GREENHOUSE GASES IN THE ATMOSPHERE BEGINS TO DECLINE ON A YEAR-TO-YEAR BASIS.

Project Drawdown is the most comprehensive plan ever proposed to reverse global warming. Our researchers have identified 100 solutions that can be implemented by 2050 to reverse global warming. The plan is based on a scientific analysis of the most effective solutions available, and it is designed to be a practical, achievable, and cost-effective plan. It is the only plan that has been endorsed by the United Nations, the World Bank, and the World Economic Forum.

EACH SOLUTION REDUCES GREENHOUSE GASES BY AVOIDING EMISSIONS AND/OR BY DIRECTLY REMOVING CARBON DIOXIDE ALREADY IN THE ATMOSPHERE.

REVERSING GLOBAL WARMING: INTRODUCTION TO DRAWDOWN Fremont Main Library, Fukaya Room B Tues July 30, 2019: 530-830 pm

I'd like to invite you to a free workshop about a new way of engaging with global warming. Like me, you might feel confused about the best way to help, guilty you are not doing more, or even wondering if it's too late anyway. I'm excited to share with you an approach to global warming that has given me optimism and focus!

The approach is described in the 2017 book "Drawdown: The Most Comprehensive Plan Ever Proposed to Reverse Global Warming" which shows the results of 5 years of rigorous scientific research on the 100 most substantive existing solutions for addressing global warming. The solutions were identified and studied by a team of 200 researchers from 22 countries led by author, environmentalist, and entrepreneur Paul Hawken. **The results reveal astounding news: it is possible not just to slow global warming, but to start reversing it as early as 2045!** Reversal begins when concentrations of climate warming gases in the atmosphere begin a downward trajectory called "drawdown".

The workshop will occur Tuesday July 30th 530-830 pm in Fukaya Room B at the Fremont Main Library (2400 Stevenson Blvd). It will include discussion of how we currently relate to global warming, an introduction to Project Drawdown and the Pachamama Alliance (the workshop creator), and a group discussion on how we may want to help implement a few solutions. Implementation is up to us! The workshop will also describe the 5-session follow-up course that is currently being piloted around the country.

Snacks will be served. I hope you can join! Please RSVP at:
