Operation Mulch Replacement

As you can see, we have 160 yards of certified playground mulch sitting outside the playground. The schedule for the playground transformation is as follows:

Friday, 8 AM -
Dumpsters will be delivered and placed on the boat ramp road in the eastbound lane. The westbound lane will remain open during the process for alternating traffic flow. A skid-steer will begin pushing the rubber mulch to the fence where it will then be loaded into the dumpsters. Adult only help will be needed during this time period to rake the mulch from under the permanently mounted playground equipment, so that the skid-steer can push it to the dumpsters. Once all the rubber mulch is removed, landscape fabric will be placed on the ground before the new mulch goes down. This is adult only time, because there will be two pieces of heavy equipment operating, and we want to do this safely.

Friday, 3 PM -
This is all hands on deck time. Bring your wheelbarrow, rake, work gloves, and middle or high school aged youth to the playground. We will begin loading mulch over the brick fence into waiting wheelbarrows for placement on the playground. We will work as long as we have light and can safely operate.

Saturday, 8 AM -
The mulch replacement resumes. However, at 10:30 AM mulch replacement work will be suspended out of respect for Liz Deaton. Those who desire can attend her memorial service at 11:00. At noon, work will resume and continue until we are done, and the moveable equipment is returned to the playground. Middle and high school aged youth are welcome to help with all of Saturday’s operations.

So we hope to see you at the playground. Any amount of time you can help would be greatly appreciated. I know that the parents, teachers, children and washing machines will appreciate this improvement to the BCLC.

Thanks,

Paul Gardner
Church Administrator
