MEDICAL DISCHARGE PROCESS

DEAN'S STORY AND SUPPORTING OTHERS

For Dean, the medical discharge process was filled with uncertainty and frustration. After 22 years as an RAF medic, he faced a pivotal moment, leaving behind the structure and identity of military life.

"After my medical discharge, I had many concerns about this unfamiliar stage of my life. Can I work? Will I find suitable employment? How will my care continue?"

Like many, Dean felt overwhelmed by the complexities of transitioning. As our Veterans Welfare Lead, he now dedicates his time to supporting veterans through similar experiences.
