

## **PETROS ZIOGAS**

### **Co-founder/CTO, Syncbnb**

Petros is co-founder and CTO of Syncbnb, a tool built to help vacation rental owners manage their properties and eliminate double bookings.

An accomplished software and web engineer for more than a 15 years, Petros has been a co-founder of two startups in the past as well as senior developer in some of the most successful web development companies in Greece and abroad.

He left his position as a lead developer in bunq (online-only bank from Netherlands) to build Syncbnb. He has worked in building a variety of projects starting from games, poker AI and humor sites all the way to a bank. He loves technology and how people team up to achieve the impossible.
