Purpose and Objectives

The City of Fort Worth (City) Transportation and Public Works Department, Stormwater Management Division is releasing this Request for Qualifications (RFQ) calling for qualified consultants to submit an expression of interest and a Statement of Qualifications (SOQ) for the Service Areas specified below.

This RFQ is intended to provide a pool of consultants that the City can use to select qualified consultants to help with broad-ranging stormwater services that often require work beginning with relatively short notice due to severe flooding and responding to community needs. The City will select consultants from this solicitation for up to three (3) years after the submission deadline. SOQs will be evaluated at the time a project need arises. All consultants that have submitted SOQs will remain eligible for work in each Service Area they submit on through the three-year period. When a specific project need is identified, a team of staff members will be formed to evaluate all SOQs for that Service Area.
