

Good afternoon,

Manhattan Construction subcontractor proposals (FOR AWARD) for the American Airlines Terminal C Fit-Out project. This exciting project includes the interior fit-out of portions of the existing American Airlines terminal and new pier at DFW airport. Construction scopes include concrete slab-on-grade, masonry, structural steel, decorative metal railings, carpentry, millwork, doors and hardware, glass and glazing, architectural finishes, fire protection and detection, plumbing, mechanical, electrical, communications, and security systems. Manhattan Construction and American Airlines prioritize Minority and Women Owned Businesses (M/WBE). Subcontractors are encouraged to incorporate M/WBE participation into their proposal strategies.

Project information is available online through the Building Connected platform. Proposals are due on or before 2:00 p.m. CST Wednesday (11/06) and must be uploaded to Building Connected to be considered. If any companies are interested, please email Daniele Rideau at [drideau@manhattanconstruction.com](mailto:drideau@manhattanconstruction.com) to receive an invitation to Manhattan's Building Connected platform.

Kind Regards,

**Daniele Rideau**
