

FOR IMMEDIATE RELEASE

## Megger Announces Launch of Rental / Leasing Service in U.S. and Canada

DALLAS, TX, Sept. 25, 2020 – Market-leading electrical test and diagnostics equipment manufacturer, Megger, announces today the launch of the Megger Rental and Leasing Service, a component of their Systems and Services business. The Megger Rental and Leasing Service will currently be available to customers in the U.S. and Canada.

The new Rental and Leasing Service puts Megger’s world-class test equipment, industry experience and technical knowledge into the hands of electrical test contractors, utilities, power generation, and distribution entities quickly and efficiently. The Megger Rental and Leasing Service includes a broad catalog of electrical testing solutions that address testing and maintenance needs in power protection, instrument transformers, cable fault and diagnostics, insulation resistance, low-resistance and battery systems. Megger Rental and Leasing customers can also depend on the technical expert engineers at Megger to assist during testing, as well as competitive pricing, flexible payment options and Megger’s vast knowledge as an original equipment manufacturer within the industry.

For more information or enquiries about Megger Rentals and Leasing, please visit <https://us.megger.com/rentals>, email [rentals@megger.com](mailto:rentals@megger.com) or call 800-728-6269 (US) 800-567-0286 (CAN).

“Megger’s entry into the services arena allows our current customers to get more out of their partnerships with Megger, while enabling new customers access to the broadest range of electrical testing equipment in the industry and the technical expertise behind it.” states Horace Davis, Vice President of Sales & Marketing, North America.
