

*Michaud Equipment LTD.* is currently looking for a

**Press Break Operator**

**Position Description** – Press Break Operator

**Reports to** - Shop supervisor

**Summary of Position** - The press break operator is responsible for producing quality parts with cost effective procedures. He / She is responsible to ensure the press Break and all associated tooling is in good working order. The operator is required to work safe, report all deficiencies of production parts, equipment and tooling to his/her immediate supervisor.

**Core Competencies** - the successful Candidate must display the following attributes as a core part of their interaction while working for the company.

- Needs to be on time for work
- Must conduct Himself / Herself with Best Safety Practices
- Takes direction well.
- Is able to work well alone or with others
- Displays respectfulness in all aspects of his relationship with other employees
- Allows minimal Non-Production Interruptions
- Shows problem solving ability
- Is adaptable and flexible.
- Is coachable
- Works productively
- Produces Quality Work

**Requirements for the Job and Work Environment** – it is important that the successful candidate has developed a skill set through his / her education and / or work experience that allows them to be capable of performing bending tasks on mild steel, grade 100, and grade 400 Carbon Steel. A high degree of accuracy and quality is required on all bending tasks. The current press Brake at Michaud has a capacity of 250 tons.

Attributes we feel allow for this output are not limited too but are contained within the list below:

- Ability to follow drawings and make parts as per drawing.
- Can easily work with fractions and / or decimals.
- Experience using typical tooling such as micrometers, calipers, and levels.
- Ability to Setup machines including tooling and proper fixtures.
- Attachment setup on fixtures including clamping & holding devices.
- Has no issue keeping equipment and work area clean?
- Understands and is willing to perform preventative maintenance functions on equipment.
- Is capable of trouble shooting basic functionality of press brake.
- Is willing to adjust workflow to be responsive to manufacturing and Service Customers.
- Has no issues lifting or handling pcs up to 50 lb
- Has developed good working practices regarding safety equipment, such as eye protection, hearing protection, etc.
- Communicates well.
- Is a team player.
- Has no issues with standing for the duration of the shift.
- Has no issues running other machines as a secondary requirement in the Metal prep area, such as Plasma cutter, saw, if required by supervisor.

Educational / Work Experience - Education and work experience are both key in this role. Michaud is looking for a Press Break Operator with minimum of 5 years experience, however a candidate with less experience will also be considered.

**\*\*\* Wage will be based on our assessment of the successful candidate.**
