Village's Voice

A NEWSLETTER FOR BALD HEAD ISLAND PROPERTY OWNERS

Dear Island Stakeholders:

The Village is planning for a Coastal Storm Damage Reduction Project for the winter of 2018-19. As part of the project, we have asked our Village Coastal Engineer, Mr. Erik Olsen to present a general overview of the project as well as answer any specific

stakeholder questions. Erik has successfully completed a variety of projects along the East Coast and is very well versed on coastal projects here on Bald Head Island. In an effort to accommodate varying schedules and to increase participation, we are offering two sessions. The first session will be held at the Bald Head Island Club on Saturday April 14th at 4:30 pm. The second session will be held at the Bald Head Association

in the Generator Society Room on Sunday April 15th at 9:30 am (or at the conclusion of Chapel Services). Erik's presentation will take approximately 30 minutes with time reserved for audience questions. If you are interested in this project, please join us. We will have coffee and water on hand- RSVPs are not necessary. For those unable to attend, we will make Erik's presentation available on the website the following week.

Regards,
