SCHOOL PSYCH LAUNCHPAD

WHERE IMPACTFUL CAREERS TAKE OFF!

School Psych Launchpad is a five-part professional learning series designed for early career school psychologists to support skill development, **confidence in assessment** practices, and effective partnership and leadership in the PPT process. Sessions will focus on the essential **components of comprehensive evaluations**, from planning to interpretation, and align with state guidance regarding identification and eligibility for Special Education services. Through **interactive training, activities, case conferencing, and collaboration**, participants will develop the strategies, practices, and judgment needed to better understand their roles and responsibilities as part of a multidisciplinary evaluation team. Just as important, **School Psych Launchpad** provides a safe, judgment-free space for new psychologists to ask questions, share challenges, and **grow their professional support network as they launch into practice!**
