

Car Seat Tech Corner

Rotating car seats are here! These car seats are handy for caregivers to be able to have the child facing the side of the vehicle when they are buckling/unbuckling their child. They can also be a great option in a special needs situation when maybe the child is getting too heavy to fit up over the side of a car seat or even great for a caregiver that might be having back issues. Keep these seats in mind when you are working with caregiver that might have a unique situation.

Orbit Baby G5 (\$480) Rear facing only: 4-30 lbs

Nuna Revv (\$599.99) Convertible: rear facing 5-40 lbs, forward facing 25-40 lbs
