

No-Cost Clinical Training For Medical Providers

more LA smiles

A UCLA-led Consortium Funded by CA DHCS
through the California Medi-Cal 2020 Demonstration

Children tend to see a medical provider 8-11 times before they see a dental provider.

In an effort to improve oral health for children with Medi-Cal, we invite you to participate, at no cost, in clinical trainings. These programs are led by UCLA faculty to better equip Medical Providers to incorporate preventive oral health practices into well-child visits.

Overview of Pediatric Dental Caries, Risk-Based Caries Prevention and Disease Management

- A review of Medi-Cal 2020 Dental Transformation Initiative and More LA Smiles
- Prevalence and severity of caries in infants, children and adolescents
- Understanding dental caries
- Risk-based assessments and population-based approaches

Who Should Participate

Family Medicine Practitioners
Pediatricians
Nurse Practitioners
Physician Assistants
Clinical Support Staff

Advanced Pediatric Risk-Based Caries Prevention and Disease Management

- A review of rationale for medical involvement in children's oral health
- Understanding risk-based integrated oral health and dental care pathways
- In-depth instruction on:
 - Performing a caries risk assessment
 - Applying fluoride varnish
 - Implementing self-management goals

Who Should Participate

Family Medicine Practitioners
Pediatricians
Nurse Practitioners

Length: 1 Hour Credits: 1 CME Format: Online or In-Person

Length: 3 Hours Credits: 3 CME Format: In-Person
