

LACTATION EDUCATION Pathway 2 Program

**ARE YOU A MATERNAL AND CHILD
HEALTHCARE PROFESSIONAL?**

**Advance Your Practice to Better Serve Your
Community: Become an IBCLC!**

Whether you're a nurse, midwife, physician, or other healthcare professional working in MCH, becoming an International Board Certified Lactation Consultant (IBCLC) is a powerful addition to your practice. Lactation certification strengthens your ability to support patients during one of the most critical windows of life and provides you with the necessary education to comprehensively support infant feeding. For eligible providers, IBCLC credentials open the door to billing for lactation education and management services.

CDU's Lactation Education Pathway 2 Program will give you the evidence-based training, clinical hours, and cultural framework to sit for the IBCLC exam and bring that expertise directly to the communities you serve.

LACTATION EDUCATION PATHWAY 2 PROGRAM

The LEP2 program prepares future lactation consultants to support families and address infant feeding inequities in underserved communities. Lactation consultants are allied health professionals trained to provide evidence-based breastfeeding/chestfeeding and infant feeding support to families from pregnancy through weaning.

Students learn to conduct lactation assessments, develop individualized feeding plans, and provide culturally responsive care while collaborating with healthcare providers and community partners. Graduates are equipped to educate families, support community health, and advocate for breastfeeding/chestfeeding as a public health priority.
