- AAP Council on School Health Policy Executive Committee co-chair (2022-present)
- AAP Autism Subcommittee (2023-present)
- Autism PediaLink faculty (2023-present)

**What motivates you to seek this position?**

As a practicing pediatrician for 25 years, I believe that children need us now more than ever. The AAP has been my professional home since I was an intern, and I have served in positions at both the national and chapter levels. I have co-authored policy statements, technical reports and book chapters on topics related to social determinants of health, community pediatrics, school health and autism. I was chapter president during the pandemic and worked diligently to re-open schools in Los Angeles. I believe that I have the experience, skills and knowledge to be district chair at this crucial time for child health in California.
