

Pediatrics Preceptor Opportunities MS3 & MS4 Student Doctors

Teaching Faculty for LA & Surrounding Communities

Genesis Medicus – Clinical Campus (“GM-CC”), has been engaged by a non-profit to facilitate MS3 and MS4 students with their clinical rotations in Los Angeles. Most of the students have chosen this educational path because they have a strong desire to be a physician and serve communities with critical healthcare needs. Their medical school experience includes in-class education coupled with clinical rotations, in their 3rd and 4th year of medical school.

Our preceptorship clinical educational model is based upon a ratio of 2 to 4 students rotating with 1 preceptor or within a group practice setting. In our effort to support the physician, Genesis Medicus has administrative staff and offices located at various teaching hospitals throughout Los Angeles. We provide physicians with the school’s educational curriculum for a successful teaching experience and available for support & guidance as needed. The students’ medical schools provide professional liability coverage during their rotations.

We are seeking pediatricians that enjoy teaching and can accommodate rotation placements ranging from 3 to 6 weeks for community or hospital based Pediatric Primary Care or Specialty Practices (mostly office based; inpatient Ok but not required) and we do offer a stipend for the physicians' time (Ex. \$1,500 for a 6-week rotation per student). One objective is for the student to find a specialty of interest and select a residency specialty option in their 4th year, and some might have an interest in applying for pediatric residency and hopefully settle within AAPCA Chapter 2 counties.

To find out more about our preceptor opportunities please contact:
