Allegheny Health Network

Allegheny Health Network's (AHN) doctors, hospitals, and health care facilities provide expert and compassionate health and wellness services. Healthier patients and superior outcomes are living proof that talented, experienced health care professionals, modern medical technology, and improved processes can help deliver coordinated, high-quality care focused on patients' needs.

Established in 2013, as part of an integrated health system, AHN serves western Pennsylvania and parts of New York, Ohio, and West Virginia.

fastfacts

Cancer Institute

Our oncology teams give patients the care and support they need to fight cancer. Doctors offer proven treatments and research new options for care, providing patients with the best possible outcome for all types of cancer.

- Advanced Immunotherapy Capabilities
- Cellular Transplantation
- Clinical Cancer Genetics
- Medical, Radiation, and Surgical Oncology
- Neuro-Oncology
- Orthopaedic Oncology
- Palliative Care

Most cancer care is provided at community-based locations. We have one of Pennsylvania's largest bone marrow and cell transplant programs. Our affiliation with the Sidney Kimmel Comprehensive Cancer Center at Johns Hopkins promotes clinical collaborations, medical education, and cancer research.

AHN oncologists personalize patient treatment based on the disease site and individual genetics. Together with Johns Hopkins, we have a combined portfolio of phase 1, 2, and 3 clinical trials from federal, industry, and investigator-initiated trials.

Cardiovascular Institute

Our doctors perform more than 2,000 heart surgeries a year, including heart transplants. They work closely with each patient to provide the best treatments and to prevent heart problems when possible, including:

- Atrial fibrillation treatment
- Advanced heart surgery
- Mechanical heart assistance
- Lung and esophageal surgery
- Minimally invasive and robotic-assisted heart, valve, and vascular surgery

Our patients have access to new medicines and innovative tools being researched through clinical trials, such as:

- Advanced hybrid procedures
- Implantable devices to monitor disease progression

Emergency Medicine

Community residents rest easy knowing that full-service emergency departments are close by for urgent health care whenever the need arises. Our emergency departments are designated as:

— **Level I Trauma Center**
(Allegheny General Hospital)

— **Level II Trauma Center**
(Forbes Hospital)

— **Joint Commission Certified Comprehensive Stroke Center**
(Allegheny General Hospital)

— **Joint Commission Certified Primary Stroke Centers**
(Forbes Hospital, Jefferson Hospital, West Penn Hospital, Allegheny General and Saint Vincent Hospital)

— **Nationally Recognized Burn Center**
(West Penn Hospital)

In addition, AHN's LifeFlight was the first air medical service in the northeastern U.S. and continues to provide emergency care and transportation across the tri-state region.

Transplant Institute

Our patients are restored to full and healthy lives through transplants of the heart, kidney, liver, pancreas, and bone marrow.

— Among the highest-quality heart, liver, and kidney transplant programs.

— A highly successful live donor kidney transplant program.

Transplant programs certified by Medicare and the United Network for Organ Sharing

Orthopaedic Institute

Our orthopaedic patients return to a more active, pain-free life thanks to nationally recognized orthopaedic diagnostic, treatment, and rehabilitation services. Our doctors help develop new devices and procedures to treat complex neuromusculoskeletal conditions and injuries.

We also deliver advanced sports medicine services to Olympic, professional, college, and high school athletes.

Official medical provider for the Pittsburgh Pirates and Pittsburgh Riverhounds and the Official U.S. Olympic Regional Medical Center.

Neuroscience Institute

Our patients benefit from some of the world's best doctors for spinal cord injuries, brain tumors, and other neurologic disorders.

— Therapies to minimize stroke brain damage

— Deep brain stimulation for Parkinson's disease, epileptic seizures, and other movement disorders

— Research into the makeup of brain tumors

— Minimally invasive spine surgical procedures

We were the first Joint Commission Certified Comprehensive Stroke Center and are the largest epilepsy program in the region.

Women's Health

From childbirth through menopause, women receive caring, personalized health care at AHN.

— Obstetrics, labor, and delivery

— Gynecological screenings

— Cancer

— Fertility issues

— Restorative pelvic medicine

— Reproductive endocrinology

Level III Neonatal Intensive Care Units (NICU) are at West Penn Hospital and Saint Vincent Hospital, along with Level II nurseries at Forbes Hospital and Jefferson Hospital.
