

ISO 9001:2015 Requirements from A to Z

The ISO 9001:2015 course content will support all your organization's needs whether transitioning to ISO 9001:2015, an in-depth understanding of the quality standard is required, or a solid working knowledge of the standard is needed to prepare for the future.

The new ISO 9001:2015 standard promotes using a Plan-Do-Check-Act cycle continuous improvement approach, the need to demonstrate effectiveness, and application of risk-based thinking through the process approach.

Our courses offer total support from transitioning to process-approach auditing and the knowledge required to support ISO 9001:2015 quality standard implementation. The learning outcomes listed below are what one can expect to gain by enrolling in this course.

Intended audience: auditors, supervisors, and managers who want/need to:

- 1) learn about ISO 9001 requirements;
- 2) interpret the ISO 9001 standard;
- 3) apply ISO 9001 to their work situation;
- 4) assess the application of risk-based thinking within the quality management system.

The course is based on the ISO 9001 portion of a certified lead auditor course. Included is a copy of the ISO 9001:2015 standard and over a dozen downloadable handouts including an ISO 9001:2015 checklist, a student textbook (desk reference), and QualityWBT Study Tips. Students must apply what they learned by completion of an assignment for marking by the instructor. The course consists of a series of lessons, illustrations, diagrams, interactive exercises, and quizzes. Successful completion of the course will result in a certificate for 16 contact hours of continuing education training plus 1.6 CEUs.

Quality Web-Based Training is accredited by the International Association for Continuing Education and Training (IACET) and is authorized to issue IACET continuing education units (CEUs).
