

Tutoring With Ava

Hi, my name is Ava and my goal is to help you reach your potential! This school year has been unusual and confusing. Some schools are doing online learning, others are completely in-person, and many have a hybrid combination. Education is currently being faced with a problem that will affect our futures. No parent or teacher wants their student to be falling behind in curriculum and standards.

That being said, students shouldn't be compared to each other. Everyone has a different learning type and goal, making it hard to create a standard of comparison.

I am here to help your student learn how to make goals and achieve their own potential. Whether it is after-school help with recent assignments or learning study strategies that will be useful for years, my goal is to stray away from "I don't get it" and help students become active learners.

This summer, I can help students from falling behind. They will continue learning in a fun and engaging way.

I was the valedictorian of Eagle County Charter Academy in 2019 and received the Honors Academic Scholarship to Vail Christian High School where I currently attend. I can help challenge high achieving students while also supporting and encouraging student that may be struggling.

I am happy to work around my schedule to meet with your student either virtually or in person. My rate is \$20 for 60 minutes, but the increment of time can be adjusted to fit your student's learning style.
