

July

TEC21 HAS EXTENDED REGISTRATION! The experience of rolling out emergency remote learning plans this spring reminded TEC21 facilitators of two very important things very quickly.

1. Our teachers need to be competent and confident in using technology to enrich their instruction.
2. Our teachers need a network of others to learn and grow from that is outside of their own buildings.

TEC21 employs some of the brightest minds in Lutheran Education to help prepare teachers for whatever is thrown their way. Last month, the TEC21 Facilitators Academy produced some of the best curriculum and learning activities to date, so don't miss the opportunity to enroll your teachers. Consider teachers on your staff who you think could benefit from additional training.

Register your teachers here: <http://tec21connect.com/registration/>! Many schools use Title money to pay for some or all of the registration fee. Click here to download a cover letter and a non-religious description of the program to submit to your Title officer: <https://tec21connect.com/registration/title-ii-funds/>.

August

Seats for this coming year's TEC21 cohorts have been filling up all summer long. In some locations there is still room and time to join before the first workshop takes place in September!

The experience of rolling out emergency remote learning plans last school year reminded TEC21 facilitators of two very important things very quickly.

1. Our teachers need to be competent and confident in using technology to enrich their instruction.
2. Our teachers need a network of others to learn and grow from that is outside of their own buildings.

TEC21 is an investment in your school, teachers and students. Consider joining our monthly workshops, designed to prepare and equip teachers to effectively integrate technology into the shifting landscape of today's classroom. Your District Education Executive would love to see every school take full advantage of this professional development opportunity!
