

## November/December

### The TEC21 Workshop Program

Your teachers are unimaginably stretched as they manage a variety of teaching and learning scenarios in this unprecedented time. The TEC21 Workshop Program boosts the mental and spiritual health of teachers, while equipping them for a new educational frontier. We recently heard this from Joel Wahlers, former principal at St. John's Lutheran School in Napa, California, now serving as the District Education Executive in the California-Nevada-Hawaii District: *"I just wanted to take a quick moment to thank you for TEC21. We have three individuals who have gone through TEC21 (including a facilitator, Kari Perna) who are now our technology coaches for the rest of our staff. Each of our grade-level groups (K-2, 3-5, and 6-8) have one TEC21 teacher helping the others, and I cannot tell you what a blessing that has been in our conversion process to online or virtual teaching and learning!"*

**2021/2022 cohorts are forming now!** Register with your name to save spots for one or more of your teachers. To register, [click here](#) or scan this QR code.

## January

Our 2020/2021 cohorts are well underway in 27 TEC21 innovation centers, and we are actively forming our 2021/2022 cohorts. Save one or two spots now for a cohort near you by registering with your (principal) name. [Ensure your teachers don't miss out on targeted, highly relevant learning during the most dynamic period of change and discovery we've experienced in the 12 years of the TEC21 Workshop Program.](#) Our coaching platform is a series of face-to-face workshops scheduled throughout the school year and held during the school day. These energetic, content-rich sessions are facilitated by Lutheran school educators who are passionate—*now more than ever*—about integrating technology into the school classroom to engage and motivate kids.

Register with your name to save spots for one or more of your teachers. To register, [click here](#) or scan this QR code.

## February

TEC21 Workshop Program cohorts are now being finalized for the 2021/2022 school term. [Don't miss out as we learn to engage technology in new ways for an exciting and dynamic teaching environment.](#) TEC21 teachers say it best: *"After the first class, I couldn't wait to go back!" ... "The class is designed for learning through experience. And TEC21 has given me the confidence needed to incorporate technology into my regular curriculum. The collaboration between fellow TEC21 groups is invaluable and I've been able to share new ideas with my own fellow teachers."*

If you don't yet know which teachers you'd like to send to represent your school, simply register with your (principal) name while you determine your funding solution. Title IIA monies may pay for registration in entirety. Some schools are supported by a local benefactor or special church/school fund.

To register, [click here](#) or scan this QR code.

To download a cover letter and a non-religious description of the program to submit to your Title officer: <https://tec21connect.com/registration/title-funds/>.

## March

TEC21 Workshop Program 2021/2022 cohorts will follow one of the most remarkable learning periods for Lutheran teachers in our history. We have seats left! Save your spots now just by registering today! [Don't miss giving your teachers the opportunity to unpack what we've learned during the 2020/2021 school term about enhanced in-person and remote learning.](#) Our teachers connect with others outside their own schools, become competent for a new educational playing field and equipped to be resources and coaches for their peers. Missouri District Workshop Facilitator Rob Jacklin said it best: *“One of the most significant ways to impact student learning in the classroom is to impact teacher learning! Teachers who are confident and open learners themselves benefit kids in the classroom.”*
